

## 2021 Student Destination Data

We use Destinations Data (post 16/18 transition for our Year 11/13 leavers) each year to evaluate the careers programme. The Local Authority also has a duty to report this information each November to the Department for Education.

The level of detail uses in the evaluation process vary depending on what information is require and who is accessing it. The graph below shows top line data of which type of post 16 options are students are attending.

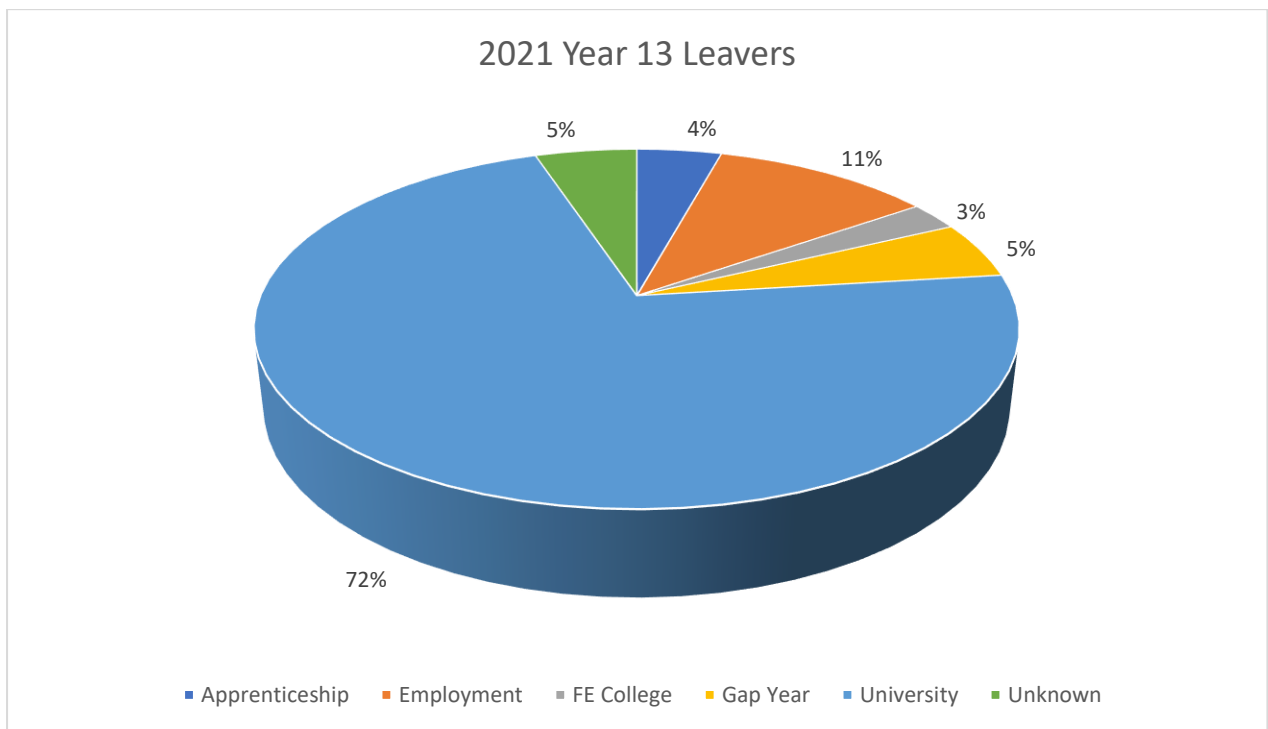

The data is also used to report our NEET figures (those students Not in Education Employment or Training) This is ultimately the most important piece of Destination Data schools focus on, as it indicates those students that haven't successfully moved onto any form of further education or employment. The school will work hard with the Local Authority and Inspira to try and assist those students wherever possible, through tracking and support offered.

## 2021 Year 11 Destinations Data

	Total Cohort	Trinity 6th Form	Apprenticeships	Uniformed Services	FE Colleges	NEET
Year 11 leavers in July 2021	269	148	12	8	98	3
