Behaviour Curriculum

Our behaviour curriculum is designed to define what expected behaviour looks like in our school. Time is allocated to weekly, year team specific assemblies, in order that we can teach students 'how we do things around at Trinity School'.

The behaviour curriculum is centred around the **teaching** of routines and habits and is used to reinforce the behaviours expected of all students. It complements a wide variety of contributions to the teaching of behaviour, such as induction and transition sessions, practicing of key routines, student and staff bulletins and of course targeted provision for more vulnerable learners.

Our behaviour curriculum:

- Reflects our school's values:
- Sets out the standards of behaviour we expect students to meet:
- Explicitly teaches our expectations and routines:
- Teaches Students to understand the necessary adjustments to routines for those with additional needs:

Material can be found via this link [Behaviour Curriculum Assemblies](#)

Form Time - Personal Development Programme

The weekly pm Form Tutor session is about Personal Development. Sessions are designed to give students a better **global and national awareness, develop their own skills and to be the best version of themselves**. It will tie in with the other areas of the curriculum such as freeze sessions, careers and themed tutor time. Schedules and material can be found via this link. [Personal Development Overview](#)
