1. INTRODUCTION

The Governing Body of Trinity School CofE Academy provides a range of services to children, adults and the wider community, and is the employer of the staff of the school.

This policy statement sets out the occupational health, safety and welfare arrangements for all employees of the Governing Body. It also applies to every other person who may be affected by the Governing Body's work activities, acts and/or services, i.e. students, young persons, clients, contractors, visitors and members of the public.

The general Policy of the Governing Body is to ensure, so far as is reasonably practicable, the health, safety and welfare of both its employees and other persons affected by the Governing Body's activities. In pursuing these general aims the Governing Body will have regard to its detailed statutory duties under the Health and Safety Act 1974, and other enactments, as well as to its available resources.

2. STATEMENT OF INTENT

- a) The Governing Body will abide by its duties and responsibilities as an employer under the Health and Safety at Work etc. Act 1974 and will seek to implement the Act and its subordinate legislation, in all activities within its control.
- b) The Governing Body recognises that effective health and safety management can contribute towards organisational performance by reducing injuries, ill health, unnecessary losses and liabilities. To this end, it will seek to create and maintain a positive health and safety culture that secures the commitment and participation of all employees in attaining the highest standards of health and safety in the workplace.
- c) The Governing Body identifies health and safety as a primary objective of its activities. To this end, it will endeavour, so far as is reasonably practicable, to conduct its activities without risk to health and safety of its employees and to those who may be affected by its activities.
- d) This general statement of the Governing Body's Safety Policy will continue in force until amended.
- e) The Policy of the Governing Body is to take appropriate steps to:
 - safeguard its employees, students, and visitors from injury or ill-health;
 - provide and maintain safe and healthy working conditions including a means of access to and egress from places of work under the Governing Body's control, which are safe and without risk;
 - provide adequate welfare facilities;
 - provide sufficient information, instruction, training and supervision to enable employees to avoid hazards and contribute positively to their own safety and health at work and to that of others affected by their acts or omissions;
 - prevent or contain all forms of loss due to accident, fire or inadequate security.

To this end, the Governing Body will aim to ensure, via an ongoing auditing, monitoring and inspection programme, that educational premises, plant and systems of work for which it is responsible are safe and do not pose risks to health.

3. GENERAL

3.1. Health and Safety Management

The Governors will ensure that a Health and Safety Management System is developed, implemented and monitored which will ensure the assessment of risk and the effective organisation, planning, monitoring and review, of the preventative and protective measures necessary to control risk.

3.2. Planning and Objectives

The School will identify and assess the risks from hazards associated with all its work activities with the aim of eliminating or controlling the risks, so far as is reasonably practicable. The School will, so far as is reasonably practicable, allocate sufficient resources to meet the requirements of this Policy.

The School will set realistic short and long term objectives, decide priorities and establish adequate performance standards. These objectives will be quantifiable wherever possible and include the commitment to continual improvement. When establishing and reviewing its objectives, the School will consider its legal and other requirements, its hazards and risks, its financial and operational needs and the views of interested parties. It will also monitor and review such standards to ensure they are being met and maintained. The School Health and Safety Management Plan drawn up by the Co-Headteachers and Governors each year, identifies various health and safety issues. Key dates, personnel and costs are identified in order to meet specific objectives. The plan includes issues such as equipment repairs and maintenance, planned health and safety training, safety policy reviews, risk assessments and actions required following audits, inspections and accidents.

The Governors will ensure that health and safety inspections of the school buildings and activities are arranged on an annual basis. Findings of inspections will be recorded using the Governors Health and Safety Inspection Checklist. Any corrective actions required following these inspections will be reported to the Co-Heads and either immediate action taken, or issues added to the Health and Safety Management Plan.

3.3. Training, Awareness and Competence

Personnel will be competent to perform tasks that may impact on health and safety in the establishment. Competence will be defined in terms of appropriate education, training and/or experience. Training procedures will take into account differing levels of:

- responsibility, ability and literacy; and
- risk.

3.4. Co-operation and Consultation

No health and safety policy is likely to be effective unless it actively involves the employees themselves. The School recognises the contribution which employees and students are able to make towards health and safety in their workplace and will co-operate and consult with employees and students as necessary.

The School will co-operate and consult with properly appointed Safety Representatives to enable them to fulfil their statutory functions and will co-operate in the setting up of a Safety Committee or Committees as required.

3.5. Co-ordination

Where the School shares premises with another department or employer, whether permanently or temporarily, arrangements and procedures will be adopted to ensure that all concerned are able to comply with their statutory health and safety duties. The School will ensure that arrangements are made to co-ordinate the activities of its own employees and those of outside agencies working on school premises, such as contractors, cleaning staff and maintenance personnel.

3.6. Information to Staff

This School Health and Safety Policy and any supplemental Guidance Documents, will be brought to the attention of all employees, both temporary and permanent, and any other persons who may need to be aware of their content. All staff, including temporary staff, employed by another organisation

e.g. cleaning staff, catering staff, learning support staff etc. will be given proper and appropriate health and safety induction immediately following their appointment.

3.7. Audit and Review of Policy

This Health and Safety Policy will be regularly reviewed and amended as necessary. Supplemental Guidance Documents, Codes of Practice etc., will similarly be regularly reviewed and where appropriate further advice will be issued relating to particular work activities or as a result of changes in health and safety legislation.

In addition to the above, the school will establish and maintain a programme of periodic Occupational Health and Safety management system audits.
